The Promotor Pathway® program targeted disconnected and disengaged youth. Study participants faced significant life obstacles such as lack of education, homelessness, trauma, substance abuse, and court involvement.

Youth lack access to reliable and consistent sources of **food**.

Youth experience periods of **housing insecurity**.

Youth face additional challenges with **health**.

Youth engage in **risky behaviors**.

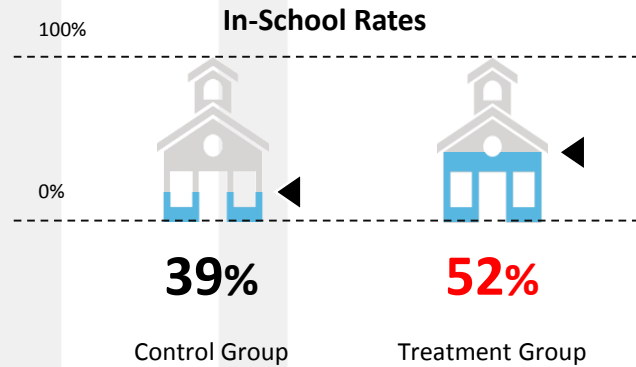

How We Create an Impact

Latin American Youth Center
Promotor Pathway®

33% Increased School Engagement

After 18 months, **39%** of the control group was enrolled in school, a decline in 7% school enrollment from baseline measurements. At 18 months, **52%** of the treatment group was enrolled in school, an increase of **4%** from baseline.

33% Reduced Child Births

In the last year of the study, the control group had a **14%** occurrence of child birth, compared to **21%** in the treatment group. The treatment group was **33%** less likely to have a child.

60% Increased Housing Stability

At baseline, 14% reported sleeping in a shelter. At 18 months, **10%** of control youth still reported having slept in a shelter, compared to only **4%** in the treatment group. The treatment group was **60%** less likely to have slept in a shelter in the past six months.
